(54) PICTURE DATA BASE SYSTEM

(57)Abstract:

PURPOSE: To provide a picture data base which can extremely efficiently perform retrieval and display and, at the same time, can easily change its picture information displaying form to a desired form.

CONSTITUTION: This picture data base system defines an album composed of one or plural pages and sets indexes or keywords and their values required for retrieving the album. Then the system registers one or plural pieces of picture information and displaying dimensional or positional information correlated with the picture information on each page constituting the album and displays the information on a picture displaying screen by pages constituting the retrieved album at the time of retrieval and display. In addition, the system changes the displaying position or dimension of the picture information displayed on the displaying screen by changing the displaying dimensional or positional information of the picture information belonging to the displayed page. Therefore, the picture information displaying position or dimension can be changed on the displaying screen.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
